

As an Independent Consultant, you know that you can't rely on your employer's insurance to protect you when things go wrong. That's why PROLINK and APCC have partnered to develop a comprehensive **Professional Insurance program** that addresses the unique risks faced by Independent Contractors working in IT and Management Consulting and Virtual Assistants.

## PROGRAM HIGHLIGHTS INCLUDE:

### PROFESSIONAL LIABILITY INSURANCE

Professional Liability Insurance will protect you from allegations of errors, omissions, or negligence committed within the scope of your profession. It'll cover your damages—legal expenses, court settlements, and administrative costs—even if the claims made against you are groundless.

### COMMERCIAL GENERAL LIABILITY INSURANCE (CGL)

CGL will defend you against third party claims of bodily injury or property damage that aren't directly related to your services as an Independent Consultant or Virtual Assistant. It will cover incidents that occur on your premises, at a client's home, or any other location related to your professional activities.

To learn more, or view the full details of the APCC Professional Insurance program, contact PROLINK today! We'll guide you to the right coverage, from the right insurance company, at the right price.
